Quality Policy

Since 2001, Energas Technologies (Pty) Ltd has built an impeccable reputation in the industry with an emphasis on quality, safety and exceptional products and services. We are a leading supplier of specialized measurement, control and filtration technologies to the oil and gas industries in Southern Africa.

It is the policy of Energas Technologies to provide products and services to its customers, which not only meet agreed contractual specifications and standards, but also satisfy or exceed the customer's service requirements.

To this end management systems and procedures are applied to meet the quality goals of the company and to satisfy the requirements of the ISO 9001: 2015 standard. We will:

- Strive to achieve our clients' requirements and keep the clients satisfied by delivering superior engineering services in partnership with all stakeholders,
- Equip our employees with the necessary skills to provide value to our clients and promote awareness of client requirements,
- Obtain total commitment to the implementation and maintenance of the quality policy from management and staff and in doing so create a quality awareness culture in our organization,
- Meet our stated objectives which are measured, reviewed and maintained on a continual basis by top management and
- Identify risks and opportunities and take appropriate action to address these.

We will strive to create an environment that stimulates innovative thinking and provide for continual improvement.

We will demonstrate improvement in our service delivery and internal processes so that we will continue to meet and build on customer requirements and stakeholder expectations.

I, the managing director, will maintain executive control of the quality management system.
